

The screenshot shows the AWS Glue Console interface. At the top, there's a navigation bar with 'AWS Glue Console' and 'React App' tabs. Below the navigation bar, there's a search bar and a 'etpipeline.cf' link. The main content area is titled 'Cloudwatch metrics' and has a 'Light' button and a 'Dark' button. The 'Dark' button is selected. Below the buttons, there's a message: 'No data found. Could not load data. The current role cannot perform logs:FilterLogEvents.' At the bottom, there are three charts: 'Invocations' (Count vs Time), 'Duration' (Milliseconds vs Time), and 'Error count and success rate (%)' (Count vs Time). The 'Invocations' chart shows a single bar at 05/10. The 'Duration' chart shows three bars (Minimum, Average, Maximum) at 05/10. The 'Error count and success rate (%)' chart shows a single bar at 05/10.
